So what is OK to pour down your sink drain?

Hi, I'm Inspector Bret! Everything poured into our sink drains and flushed down our toilets ends up in our oceans, so if it's not good for us to drink or eat, it won't be good for frogs, insects, birds and fish either. If there is any doubt about environmentally responsible disposal, you should contact the City of Memphis Environmental Dept at 901-636-8118. If any product says "hazardous waste" on the label, it must be taken to a disposal facility! All other products in question should go into the regular garbage, (things like medicine, cleaning products and paint) don't flush it down the toilet or wash it down the drain. Why? Because modern landfills are designed with liners to prevent dangerous material from leeching out, whereas waste water treatment systems might not even detect—let alone eliminate—substances in water that can harm wildlife.

Hi! I'm FLO, the sink!
I love water!
Please don't ever feed me
Fats, Oils or Grease (FOG)
or anything toxic.
They can make me and

friends sick!

HI FRIENDS!

Why does it seem like our summer break gets shorter and shorter every year? Maybe because time flies when you're having fun! I rode my bike a lot, played in my neighborhood park and enjoyed several great cookouts in our back yard. What did you do this summer? Write to me and tell me! (see page 6)

Back to school is an exciting time, I look forward to new school supplies and seeing my friends again. My favorite subject is science and my favorite class is RECESS! What about you?

BE GREEN LIKE ME and when buying your new school supplies, choose simple, cheap and non plastic options. Paper and cardboard folders and notebook covers are best and usually cheaper, and allows you to spend a little extra on recycled printer paper. Also, as suggested by a popular teacher on Tik Tok, use plain glue sticks instead of colored (you usually get more for your \$) and get rulers and pencils made of sustainable or recycled materials. Avoid disposable plastic if you can. Every little bit helps our beautiful planet!

Jabberblabber E-zine offers hours of educational fun, easily printable on 8.5 x 11 paper for use at home or in the classroom. Also, you can go to the "Archive" tab to read some previous issues. It's always free, thanks to the sponsors and advertisers you see throughout who share our family friendly values! Let them know you appreciate them by considering them the next time your family needs their services.

See you in September!
Bye for now!
Peace and love,

There is a pencil sharpener hidden in this E-Zine somewhere. See if you can help him find it!

10 WAYS YOU CAN BE GREEN LIKE ME!

- 2. Turn it off!** When you're the last one to leave the room, ALWAYS turn off the lights!
- 3. Unplug It!** Reduce your home energy bill 10% by unplugging your cell phone charger, TV, stereo, and computer when you're not using them.
- 4. Say NO to plastic bags!** Bring your own bag when you go shopping. Plastic is bad for land & animals!
- 5. Shop Locally!** Support local farmers & local businesses who produce here at home.
- 6. Don't Idle!** If you are going to be parked more than 10 seconds, turn it off! Idling cars produce 25% of all CO₂ emissions.
- 7. Recycle!** Cans, bottles, cardboard and plastic. Donate unwanted clothes, toys & furniture.
- 8. Reuse!** Get a washable, reusable and refillable water bottle.
- 9. Conserve Water!** Turn off the faucet while brushing your teeth and take a short shower rather than a bath.

MEMPHIS SHELBY COUNTY SCHOOLS FARM TO SCHOOL PROGRAM

Farm to School is broadly defined by MSCS F2S as a program that connects schools (K-12) and local farms with the objectives of serving healthy meals in school cafeterias, improving student nutrition, providing agriculture, health and nutrition education opportunities, and supporting local and regional farmers.

Nutrition Services is partnering with local, state, regional and national groups to implement and expand Farm to School opportunities in Shelby County.

Local foods are a valuable and important resource: they are fresh, healthy, and tasty – and people tend to eat more produce when tasty, seasonal products are available. Having a strong local food system supports local farmers and sustains the working landscape – improving the local economy. They can also improve landscapes, strengthen community relationships, and help us reconnect to the land.

There's a long list of local and regional .orgs who offer educational resources, programs and field trips. Here are a few examples below.

DOCTOR'S ORDERS

AUGUST TOPIC: 5 Tips to Ease Back-to-School Anxiety

By Erika Alana Chiappini, Ph.D.

Parents or caregivers may notice their children exhibiting some nervousness about new routines, schoolwork or social interactions.

Here are some tips to Ease Your Child's Back-to-School Anxiety:

- A week or two before school, start preparing children for the upcoming transition by resuming school-year routines, such as setting a realistic bedtime and selecting tomorrow's clothes.
- Arrange play dates with one or more familiar peers before school starts. Research shows that the presence of a familiar peer during school transitions can improve children's academic and emotional adjustment.
- Visit the school before the school year begins, rehearse the drop-off and spend time on the playground or inside the classroom if the building is open. Have your child practice walking into class while you wait outside or down the hall.
- Come up with a prize or a rewarding activity that the child could earn for separating from mom or dad to attend school.
- Validate the child's worry by acknowledging that, like any new activity, starting school can be hard but soon becomes easy and fun.

There are several easy ways to tell when a child's anxiety is cause for concern. Red flags that indicate a child's anxiety is causing a great deal of distress include:

- Tantrums when separating from parents or caregivers to attend school
- Difficulty getting along with family members or friends
- Avoidance of normal activities in and outside of school
- Symptoms such as stomach aches, fatigue, difficulty sleeping alone

If after the first month or so, your child continues to show distress around school that is not improving or if the child's symptoms are worsening, it may be time to seek an evaluation from a psychologist or psychiatrist.

ACTIVITY OF THE MONTH

Paint with Ice

What You Need:

Liquid tempera paint (different colors)

Ice cube tray - Popsicle sticks - Any heavy paper or material - Plastic wrap (optional)

Old tablecloth or newspaper to cover your work space

Directions:

Pour different color paint into the ice cube tray. Place a craft stick into the middle of each paint cube. The sticks should be able to stand up on their own, but if they won't stay up, try covering the tray in plastic wrap.

Then poke the sticks through the wrap for extra stability.

Carefully place the ice cube tray in the freezer, and let it sit until the paint is frozen solid.

When the paint cubes are frozen, it's time to paint!

Pop the chosen paint cube out of the tray and swirl the frozen paint cube over paper or material.

Ice paint is also a great tool for teaching color mixing by painting with primary colors like yellow and red.

Then let your child discover the results as they melt and magically mix into orange!

So what is OK to pour down your sink drain? **ANSWERS**

Hi, I'm Inspector Bret! Everything poured into our sink drains and flushed down our toilets ends up in our oceans, so if it's not good for us to drink or eat, it won't be good for frogs, insects, birds and fish either. If there is any doubt about environmentally responsible disposal, you should contact the City of Memphis Environmental Dept at 901-636-8118. If any product says "hazardous waste" on the label, it must be taken to a disposal facility! All other products in question should go into the regular garbage, (things like medicine, cleaning products and paint) don't flush it down the toilet or wash it down the drain. Why? Because modern landfills are designed with liners to prevent dangerous material from leeching out, whereas waste water treatment systems might not even detect—let alone eliminate—substances in water that can harm wildlife.

Hi! I'm FLO, the sink!
I love water!
Please don't ever feed me
